Sounds fabulous! I think she would like that.

**Subject:** potential project

I have a potential project for Annie. The CT lab is getting a Raman spectrometer within the next few months. There are tremendous applications to forensic drug work. I would like Annie to assess the feasibility of using such equipment in our lab by running samples concurrently on GC/MS and Raman and IR. This would make an outstanding study /publication and provide some really good information for us (potentially faster, non-destructive technique). I am confident that I could find a graduate student intern to work with her on this. What do you think?
